CAREER OBJECTIVE

MCA student specialising in Data Science and Artificial Intelligence seeking opportunities in Data Science to apply machine learning, statistical modelling, and data-driven problem-solving skills in a high-impact product environment. Experienced in converting large datasets and research findings into clear, actionable insights for senior stakeholders. Holds two Oracle Cloud certifications in Data Science and holds production experience in Python-based ML tooling, automated testing frameworks, and enterprise IT systems.

TECHNICAL SKILLS

Programming:	Python, Java, SQL (MySQL), PL/SQL, PHP, HTML, CSS
ML / AI:	Machine Learning, Artificial Intelligence, AutoML, MLOps, Statistical Modelling, Data Analysis, Data Visualisation
Cloud / Tools:	Oracle Cloud Infrastructure (OCI), Oracle APEX, REST APIs, MS Office Suite (Excel, Word, PowerPoint), Google Workspace
Platforms:	GitHub, CRM Platforms, AI-Powered Research Tools, QA Automation (POM Architecture)
Core Competencies:	Data Exploration, Stakeholder Communication, Structured Reporting, Problem Formulation, Algorithm Design, Research & Analysis

INTERNSHIPS AND EXPERIENCE

Project Manager Intern | Helioustin.io

June 2026 – Present | Remote, India

- Conducted structured market and industry research across 12+ pharmaceutical and life sciences sectors using data-driven pattern analysis, identifying strategic partnership opportunities and business development leads for an AI-powered compliance platform.
- Produced Daily Research Reports (DPRs) and weekly strategic briefs consumed by senior leadership for business development decisions — demonstrating the ability to translate complex multi-variable data into clear, actionable insights for non-technical stakeholders.
- Identified cross-sector trends in FDA enforcement data, market growth rates, and regulatory timelines to generate forward-looking strategic recommendations — directly applying the 'discover new questions within a problem area' and 'produce compelling, actionable insights' competencies required for Microsoft's Data Scientist role.
- Used AI-powered research tools, CRM platforms, and Google Workspace to manage research pipelines, track leads, and deliver structured deliverables consistently, combining analytical thinking with practical tooling in a fast-paced, target-driven environment.

Data Scientist Intern | Infosys

February 2026 – April 2026 | India

- Built WebScan Pro: a Python-based, automated web security testing tool aligned with OWASP standards, covering SQL Injection, Cross-Site Scripting (XSS), and access control vulnerability detection — implementing end-to-end algorithm design, data collection, and severity-classified reporting in a single pipeline.
- Designed algorithms to analyse web application vulnerability data and generate structured severity reports — applying problem formulation, result interpretation, and iterative validation skills central to the Microsoft Data Scientist Intern role.

- Validated the tool against real-world web applications, monitored outputs, and iterated on detection logic to improve accuracy — demonstrating the 'monitor, analyse, and iterate to continuously improve' competency.
- GitHub: github.com/PrabhjotKaur023/WebScanPro-WebApp-Security-Tool

Software Associate | Capgemini Technology Services India Limited

November 2024 – March 2025 | Noida, India

- Contributed to enterprise software development and IT support for Dassault Falcon Jet, applying IT security principles in system configuration and Identity & Access Management (IAM) processes.
- Resolved complex system, access, and configuration issues through structured analytical troubleshooting, developing disciplined problem-solving skills within a large-scale engineering environment.

PROJECTS

QA Automation Platform | Personal Project

May 2026 – July 2026 | github.com/PrabhjotKaur023/qa-automation-platform

- Developed a modular, production-grade QA automation platform using Python and Page Object Model (POM) architecture to automate functional, regression, and end-to-end web application testing.
- Built reusable test scripts with integrated defect reporting that continuously monitors and validates application behaviour — directly paralleling the 'monitor, analyse, and iterate' and 'validate your approach' responsibilities in Microsoft's Data Scientist Intern role.
- Reduced manual testing effort by automating repetitive test cases, improving software quality and team productivity.

Smart Parking Management System | Personal Project

June 2026 | github.com/PrabhjotKaur023/SmartParkingSystem

- Designed and developed a full-stack, database-driven parking management system with secure user authentication, real-time slot availability tracking, and administrative dashboards.
- Implemented CRUD operations using SQL and backend logic, demonstrating the ability to formulate data-driven approaches to real-world operational problems and deliver end-to-end technical solutions.

CERTIFICATIONS

- **Oracle Cloud Infrastructure 2025 Certified Data Science Professional** October 2025
— OCI Data Science, AutoML, cloud-based model deployment, MLOps fundamentals, data visualisation, responsible AI practices
[CERTIFICATE LINK](#)
- **Oracle APEX Cloud Developer Professional** October 2025
— SQL, PL/SQL, REST APIs, data integration, database-driven application development, cloud deployment best practices.
[CERTIFICATE LINK](#)

LANGUAGES

Punjabi — Native | **English** — C1 Proficient (Listening, Reading, Writing, Speaking, Interaction) | **German** — A1 Basic

EDUCATION

Master of Computer Applications (MCA) | Lovely Professional University

August 2025 – Present | Phagwara, Punjab, India

CGPA: 8.58 / 10

- Core Subjects: Machine Learning, Artificial Intelligence, Software Testing, Python, Java, Data Structures & Algorithms, MySQL, Computer Networks, Project Management, Problem Solving & Analytical Skills

Bachelor of Commerce (B.Com) | Lovely Professional University

August 2021 – August 2024 | Phagwara, Punjab, India

CGPA: 8.71 / 10

- Core Subjects: Financial Accounting, Cost Accounting, Business Management, Economics, Business Law, Taxation — providing strong quantitative reasoning and business context skills that complement technical data science work
